

NEO HYBRIDE ALUMINIUM-PVC WINDOW

DESIGN, COMFORT AND PERFORMANCE

QUADRA PLAST
Extrusions - Solutions

IN ACCORDANCE WITH INDUSTRY STANDARDS

Tests were performed by an independent CSA-approved laboratory, in compliance with

NAFS-08/CLASSE CW-CP70-C and NAFS-08/CLASSE R-CP100-C

window standards.

RESISTANCE TO AIR INFILTRATION **A-3**

RESISTANCE TO WATER INFILTRATION **B-7**

WIND LOAD RESISTANCE **C-5**

FORCED ENTRY RESISTANCE **F-20**

HIGH ENERGY EFFICIENCY WINDOW

5 1/2 in.
standard frame

6 3/8 in. frame
exterior aluminium frame
(clipped or screwed) with
brick molding

NEO-ADVANTAGES

The NEO window system is recognized in the window industry as being a top-tiered window structure made with the industry recognized Quadra Plast glossy finish. To create the glossy finish Quadra Plast uses a PVC recipe which has taken years to optimize using the purest of ingredients. This approach will create not only a beautiful long lasting finish but will also resist deterioration and weathering caused by pollution and our harsh climate for many years to come.

THE PERFORMANCE OF PVC COMBINED WITH THE RIGIDITY AND BEAUTY OF ALUMINIUM

- Stylish frame with elegant lines
- Multi cavity design for thermal performance and strength
- Triple weather-stripping on sash for superior resistance
- All profiles made with premium grade PVC powder creating a glossy, low-porosity, maintenance free extrusion
- Built-in 1/2 in. or 3/4 in. drywall return
- Allows the use of a double glass of 7/8 in. 1 in. and a triple glass of 1 1/4 in. thermal units
- Range of decorative molding
- Long lasting combination painted Extruded Aluminum and PVC
- Shares look and design with all other Neo styled window systems
